

REMARKS

This 4th amendment changes the FIG 4 drawing in the above CIP. Because FIG 4 and FIG 5 are on the same sheet in the CIP, I have included both in their original positions on the enclosed unnumbered drawing sheet following this sheet 7. There is no change to FIG 5.

The changed FIG 4 requires revising the subsection in the 2nd amendment titled, "Small Flywheels". The entire subsection including the title is shown with strikethroughs on sheet 2. The entire revised subsection is shown underlined on sheet 3 with the new title, "Moderated Combustion Pressure". Delete the entire subsection shown on sheet 2, including its title, and replace it with the entire revised subsection, including the new title, shown on sheet 3 of this 4th amendment.

The changed FIG 4 also requires a third change to Claim 7. This 4th amendment does not change any other claims. Claim 7 was changed in the 2nd amendment and again in the 3rd amendment so its parenthetical status is shown as (previously presented) in the 3rd amendment. The changed Claim 7 in this 4th amendment has the parenthetical status (thrice amended). (thrice amended) is used on advice from the Inventor's Assistance Ctr. who I called for advice after the 2nd amendment was mailed to the PTO. The complete listing of all the claims are on sheets 4-6.

Claim 20 was withdrawn in the 3rd amendment and replaced by the new claim 21. I am uncertain which parenthetical expression(s) apply to them in this 4th amendment so I copied them intact into this 4th amendment. They are on sheet 6

The matter in this 4th amendment is equivalent to existing matter. There is no new matter in this amendment.
